## EDUCATION

### UNIVERSITY OF TEXAS AT DALLAS

Master of Science in Computer Science, GPA: 3.4/4.0

Richardson, TX

May 2024

- Relevant Coursework:** Object-oriented programming with Python, Data Management, System Analysis & Project Management, Agile Project Management, Data Visualization, Customer Relationship Management with Salesforce, Data Warehousing, Organizational Behavior, Innovation & Entrepreneurship

### JNTUH COLLEGE OF ENGINEERING

Bachelor of Technology in Information Technology, CGPA: 7.2/10

Hyderabad, India

Jul 2021

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, HTML, CSS, SQL, C, C++, PHP, PySpark, XML.

**Databases:** SQL Server, MongoDB, No SQL Server

**Tools & Technologies:** AWS, Azure, Pandas, NumPy, Matplotlib, SDLC, ETL, Power BI, Tableau, Excel, RASA, Django, React, Hibernate, AJAX, RESTful APIs, Express.js, Jenkins, Kubernetes, Git, Kafka, Distributed Computing, Hadoop, Databricks.

## EXPERIENCE

### COMPANY NAME

Dallas, TX

#### Data Analyst - Python, Power Bi, SQL, Tableau, Spark, Jupyter, SDLC

Jan 2021 - Jul 2022

- Used Python (Pandas, NumPy, Matplotlib) for data cleaning and analysis, revealing customer behavior trends from large datasets.
- Implemented Spark and PySpark solutions for big data processing, reducing large-scale dataset processing time by 40%.
- Performed exploratory data analysis with Jupyter, driving data-informed strategies across the SDLC through cross-functional collaboration.
- Optimized SQL queries for ETL processes, boosting data pipeline efficiency by 30% and ensuring downstream data accuracy.
- Created interactive Power BI and Tableau dashboards, improving decision-making efficiency by 25% through actionable data insights.

### COMPANY NAME

Dallas, TX

#### Data Analyst Intern - SQL, Tableau, Excel, ETL

Jan 2019 - Apr 2019

- Developed, managed databases that support performance improvements activities and converted business objectives to analytical problems.
- Worked Cross functionally throughout the organization to maintain the integrity of the database.
- Performed data query, extraction, compilation and reporting tasks. Applied various excel functions to aggregate data.
- Visualized the data into various charts to understand the trend, patterns and correlations using tools such as Tableau.
- Experienced in writing SQL queries for data retrieval and transformation.

## PROJECTS

### Onyx Center Source AI Chatbot - Python, Django, RASA, My SQL, Tableau

- Developed and integrated a RASA-based AI chatbot for GroupPay, increasing profits by 40% through improved data collection efficiency.
- Implemented database storage for all chatbot interactions, enabling ongoing analysis and continuous accuracy improvements.
- Visualized interaction data using Tableau and enhanced chatbot performance through in-depth conversation analysis and model fine-tuning.

### Spoonful of Hyderabad - HTML, CSS, Bootstrap, JavaScript and XML

- Developed a digital marketing website for food bloggers where I designed and built the website.
- Our website helped them garner more followers on social media and provided them new business opportunities.

### Ecostructive - Python, Django, MySQL, HTML, CSS, Power BI

- Created a web app for waste management, allowing user-specific garbage collection requests and predictive modeling for trend forecasting.
- Utilized Power BI dashboards to gain operational insights, optimize routes, and reduce costs in waste management processes.
- Implemented subscription models and targeted advertising to ensure financial viability while streamlining recycling through authorized collection teams.

### eCompare - Web Scraping, Machine Learning for Voice Recognition and Text based search, MySQL, HTML, CSS

- Created a web app for waste management, allowing user-specific garbage collection requests and predictive modeling for trend forecasting.
- Utilized Power BI dashboards to gain operational insights, optimize routes, and reduce costs in waste management processes.
- Implemented subscription models and targeted advertising to ensure financial viability while streamlining recycling through authorized collection teams.

## CERTIFICATIONS

AWS Certified Cloud Practitioner

Salesforce Certified Administrator

SQL for Data Science
